Subject: WHMD Non-Potable Irrigation Update

Hello,

We want to keep you informed on the latest status of the non-potable irrigation system within Windsor Highlands MD.

Water Source Update:

Direct river flow has ended for the season. The District has transitioned to our Loudon Extension charge water, and our available supply has decreased to 1 CFS.

Water Restrictions

Starting June 22, the following restrictions will be in effect:

- Homeowners are permitted to water the equivalent of **two full cycles per week**. These can be split into smaller runs throughout the week as long as the total does not exceed two full cycles.
- All common areas and tracts will be shut off.

The District has communicated these restrictions to all community water contractors. We will continue to keep you updated as conditions change.

Thank you for your understanding.

Sincerely,

Windsor Highlands Metropolitan District
